## MyLink and ZoomLink – The new wireless solution for improved communication in difficult listening situations

In today's world, we are all active and would like to enjoy this lifestyle for as long as possible. Even with the best hearing instruments, communication in noisy situations can be a challenge. Enhance your hearing instruments with MyLink and ZoomLink now. You will sharpen your ability to tune into dialogue in a relaxing manner and hear more of what **you** enjoy.

# MyLink together with ZoomLink gives you direct access to what you want to hear

## Relaxing conversations

Whether you enjoy a family gathering or dinner at a restaurant, you hear what is important to you.

## Outdoor activities

MyLink and ZoomLink help filter out the noise of wind or large crowds that tend to take the joy out of watching a ball game, going for a bike ride, or a walk on the beach.

## Shopping

When shopping at the mall, you face a multitude of background noises. Put the fun back in this activity!

## Watching TV

Finding a volume level that accommodates everybody's needs can be quite a challenge. Either the volume is set too high for normal hearing people or not high enough for hearing impaired people. MyLink and ZoomLink solve this dilemma quickly, easily, and affordably.

## How do MyLink and ZoomLink work?

(3)

(2)

The speakers' voice is picked up by a microphone in the ZoomLink transmitter (1) and sent to the MyLink receiver (2) which relays the signal to the hearing instruments (3).

(1)

# Easy. Discreet. Trendy.

## Easy

It has never been easier to use a wireless hearing system. Just switch on the wireless transmitter ZoomLink, switch on MyLink, and select 'T' or 'MT' on your hearing instruments.

## Discreet

MyLink is just 12 mm (0.47 inches) thick and can be worn completely invisible under clothing.

## Trendy

MyLink can also be worn openly. MyLink is small, well designed, and its silver color gives it a high-tech appeal.

## MyLink and ZoomLink is a very attractive combination

ZoomLink is a new transmitter with three microphone settings, which provides you in each listening situation with the right reception angle. ZoomLink is compatible with all Phonak receivers.

The MyLink receiver with the ZoomLink transmitter is a very attractive combination. MyLink is compatible with all hearing instruments with a T-coil, including custom products. Together with the easy and flexible ZoomLink transmitter, you will be able to tune in for a crisp sound!

Wireless hearing systems are by far the best technology to improve speech understanding in noise, addressing the number one desire of adult hearing instrument users.

# MyLink and its trendy design

Actual size

MyLink is designed to be worn visibly around the neck or completely hidden under clothing. MyLink's high-tech design will allow you to feel completely confident. The color is smart silver, which can be worn with any type of clothing. MyLink is thin which ensures maximum comfort when worn under clothing.

# MyLink and ZoomLink - a very attractive combination

- Better understanding in noisy situations
- Very easy to use
- Works with most hearing instruments
- Trendy design: small, thin, beautiful
- Enriches your life!
